SUMMARY

Operations and technology lead who helps small, non-technical teams adopt AI safely. I write plain-language AI policy, run the tools and train the people using them. Seven years in operations, full-stack engineering training and a working focus on accessibility.

EXPERIENCE

Operations Coordinator, Dance/NYC New York, NY · April 2026 – present

- Researched and wrote an 11-document AI governance and integration framework covering policy, training, equity, funding and implementation. Presented it to the Executive Director.
- Own the org's Claude Team workspace. Administer Google Workspace, Notion, Fathom and Submittable.
- Clean and maintain CRM data in Neon One using Python.
- Built the org's internal systems and trackers in Notion. Ship UI updates.
- Support board operations, development and HR for a small team.

Founder, inline/access Remote · 2024 – present

- Run a one-person studio offering fixed-scope work in AI integration, WCAG accessibility and data visualization.
- Build accessible web apps in React, Vue and TypeScript to WCAG 2.2.

Web Developer Consultant (contract), Digital Counsel Remote · 2025

- Designed the content structure and data schemas for an architecture firm's portfolio site on Sanity CMS.
- Reviewed user flows with the team weekly.

Production Manager, Workspace11 Brooklyn, NY · 2021 – 2022

- Built and led a new finishing department, connecting design intent to production.
- Introduced standard documentation and scheduling, raising team productivity by 30%.

Operations and Project Manager, Still House New York, NY · 2018 – 2020

- Ran e-commerce updates in Shopify, growing online sales by 15%.
- Managed vendor relationships and cross-team communication, contributing to a 20% rise in revenue.

EDUCATION AND CERTIFICATIONS

- BFA, The Cooper Union, 2019
- Full-stack Java program, Tech Elevator, 800+ hours, 2024
- Deque Digital Accessibility Scholarship
- IAAP accessibility certification, in progress

SKILLS

AI governance and enablement: acceptable use policy, staff training, plain-language guides, rollout planning

Tools: Claude (Team admin), Google Workspace, Notion, Neon One CRM, Submittable, Fathom

Technical: Python, JavaScript, TypeScript, React, SQL, WCAG 2.2

Selected projects: ACCEX, an accessible color contrast checker (Vue). This portfolio, built in vanilla JS with 100 Lighthouse scores.
